

SERVICELINK DIRECT – MULTI LOCATION STOCK

OVERVIEW

The multi location stock module keeps track of stock movements between any number of stock locations e.g. stock carried in vans , items on customer premises etc.

The flow of the system – goods are receipted into a stock location, then issued to a job from that location. Items issued from a stock location to a job are added to the list of materials used on the job details, for costing and charging purposes.

Stock can be transferred from one location to another. There is a facility to post stock adjustments.

Transactions are posted in batches for control purposes.

Batch Number batch123

Product: 01510 SAREL 01510 TERM BOX - SQ

Transaction Type: Issue Receipt Transfer Adjustment

Location: Van Number 1

Own Ref: sheet 89

Description: stock refill

Quantity: 10

REPORTS

STOCKHOLDING BY LOCATION

This report provides a list of stock balances at any location, intended primarily for stock checking purposes.

TRANSACTION LIST

Shows stock movements as an audit trail by batch input

STOCK VALUATION REPORT

Provides a valuation for a range of products and a range of locations

STOCK MOVEMENT BY LOCATION

Provides a history of stock movements in each location.

STOCK BELOW REORDER

Provides a means of generating a list of items that are running low and should be ordered. This report runs by location.

STOCK ENQUIRY

There is an enquiry facility that will show the locations where a stock item is used and the stock balance at that location.

This provides a quick method of tracking down an item that is in short supply.
